

JONATHAN OPIO

SOFTWARE ENGINEER

PROFESSIONAL SUMMARY

I am a software engineer with experience in project/application development and design. I am also experienced in coordinating and delegating with a team.

WORK EXPERIENCE

Ugify Store

Digital Analyst | March 2021 - Present

- Collecting and analyzing customer data, and behavioral data, to adjust marketing strategies accordingly.
- Creating data visualizations and providing insights and recommendations.
- Evaluating ongoing market trends using testing campaigns to estimate click-through rates and conversion ratios.

Watoto Church

Full Stack Developer | April 2021 - May 2021

- Created a front-end interface for storing, updating and retrieving customer information conveniently and efficiently.
- Centralized the storage of customer information in a database and vastly reduced the time taken to record and update payments.

Ugify Store

Application Developer | August 2020 - April 2021

- Designed a more modern website that draws in newer customers and vastly improved the website's SEO rating by Google.
- Mobile application made the store more accessible, since most of the customer base prefers to shop on mobile.

Calvin University

Crew Line - Crew Line Lead | February 2017 - March 2020

- Supervised and delegated crew members
- Trained crew members
- Performed quality assurance of crew members' work
- Maintained equipment

Central Public Health Laboratory

Intern | April 2016 - June 2016

- Utilised the electronic filing system to digitalize the patients' information and reduced on the reliance on paper records.
